A. I have seen no trace or hint of international trigades. Skilled and politically conscious workers, however, are being brought in from both Germany and Italy as repatriates.

I heard discussions of this among high-ranking party members. These workers from Italy and Germany are not for Ireace, but to work in Yugoslav industry. The wass reason is behind the intensive repatriation program now being carried on in Canada and the U.S. The Yugoslave hope to get not only skilled workers but also dollars with which to buy machinery from these people.
